

CASE STUDY

Matt Cruickshank

20 year old student from Sydney, Australia

"I wouldn't have got this far without F1 in Schools"

Matt with Adrien Newey OBE Chief Technical Officer Red Bull Formula One team.

Post F1 in Schools STEM Challenge

Matt has realized his ambition to work for Formula One after being head-hunted by Chief Technical officer, Adrien Newey and the Red Bull Formula One racing team.

Starting in aerodynamic development team matt has now moved to the CFD department. Atypical day for Matt is spent simulating airflow over a race car using a super computer.

Matt works with a wide variety of people. Aerodynamicists who design and scheme the parts and also the surfacing model team and model designers who work with CAD to manufacturer the parts

"Fundamentally this is the same work that the students do in F1 in Schools, but on a much bigger scale"
