TEAM - GROUND FORCE PROJECT

2013 - Manufacturing Engineer & Marketing Manager
Attended World Finals Austin, Texas

Nominated for R&D Award & Marketing & Sponsorship Award
2012 - National Champions
Attended World Finals in Abu Dhabi

"Before participating in F1 I Schools, I wanted to become an architect, but the competition helped me to discover the world of Mechanical Engineering and realise that with hard work and dedication anything is possible."

"F1 in Schools taught me to manage a project, divide tasks, finish them on time, work effectively as a team and cooperate with other people"

Post F1 in Schools STEM Challenge

Natasha started Engineering classes in October and by the end of November she had already become a member of NTU Athens Formula Student Team. Formula Student teams rarely accept first year students. Natasha credits her acceptance with being part of a successful F1 in Schools Team.

"Every F1 in Schools day isn't a boring school day, but a day which will bring you closer to your dreams."

"Including F1 in Schools on my CV has been an indisputable advantage!"
